Unikuise Question Bank

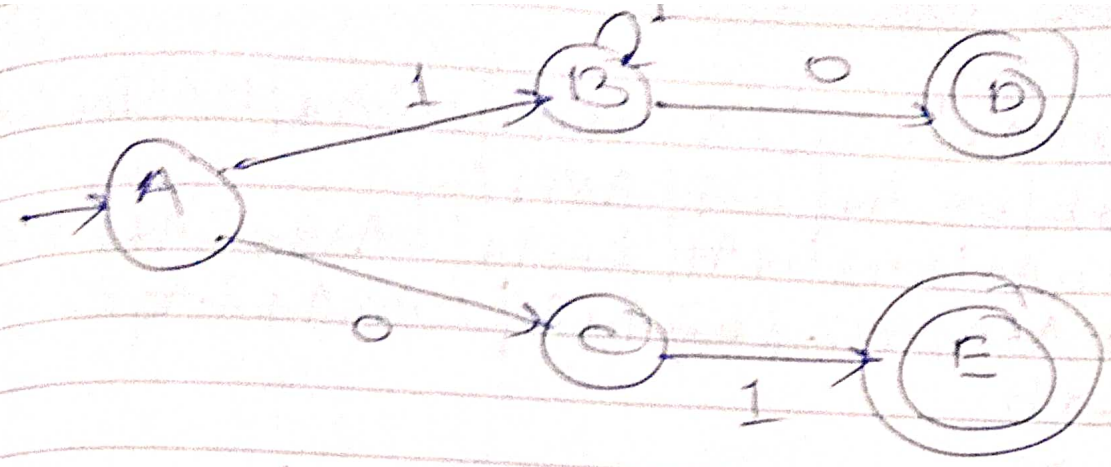

Unit 1

Question Bank:

1) Differentiate betn DFA & NFA
2) What is ∈ transition (∈ move) (Null move).
3) What do you mean by acceptance of strings and Languages
4) construct a DFA that doesnot accept the string "0011" in it.
5) Construct minimal DFA with the DFA Given below.

6) Define the terms:
   1) Cardinality 2) Language
7) Explain the structure of DFA with example.
8) Construct a DFA that accepts sets of all Strings over {0,1} of length 2.
9) construct a DFA which accepts a language contain a.
10) Construct a DFA which accepts a language which end with a.
11) Which Language is represented by following DFA. Given:

12) Construct a NFA which accepts set of all strings that ends with 1.

13) Find the equivalent DFA for the NFA given by

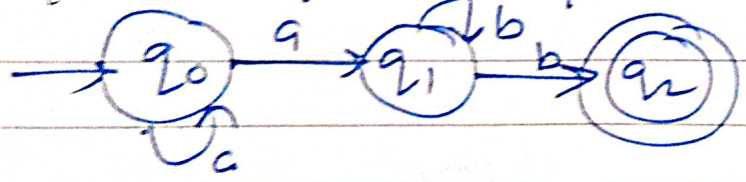

$M = (\{A, B, C\}, \{a, b\}, \delta, A, \{C\})$

where δ is given by

	a	b	
→	A	{A, B}	C
	B	A	B
*	C	-	AB

14. Explain the term NFA with ϵ moves.

15. Design the equivalent DFA for the given NFA

16 Construct a NFA accepting the set of all strings over $\Sigma = (P, Q)$ ending in "PQP"

17. Design the equivalent DFA for the following NFA $M = (\{P, Q, r, s\}, \{0, 1\}, \delta, P, S)$ where δ is given as

δ	ϵ	0	1
P		{P, Q}	P
Q		r	r
S	r	S	S
